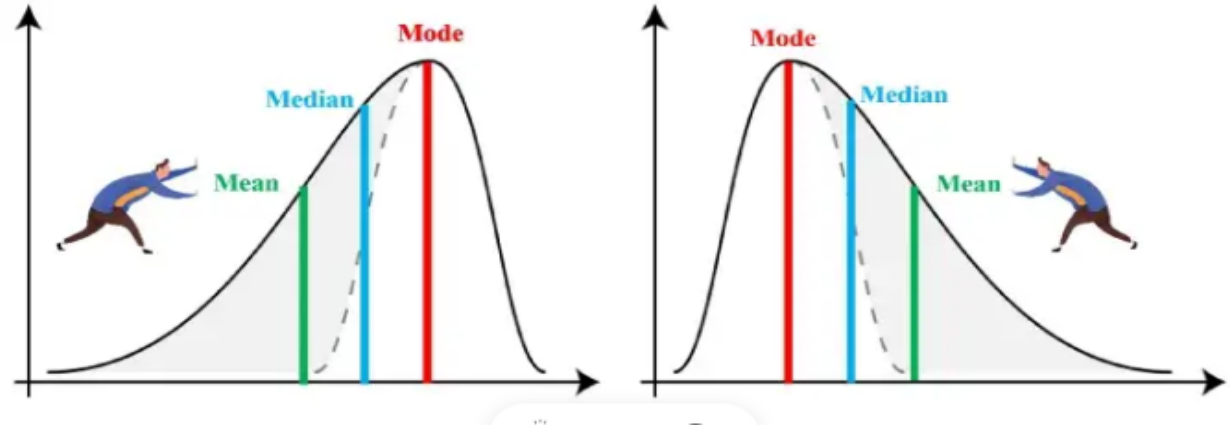
Skewness and Kurtosis

Skewness



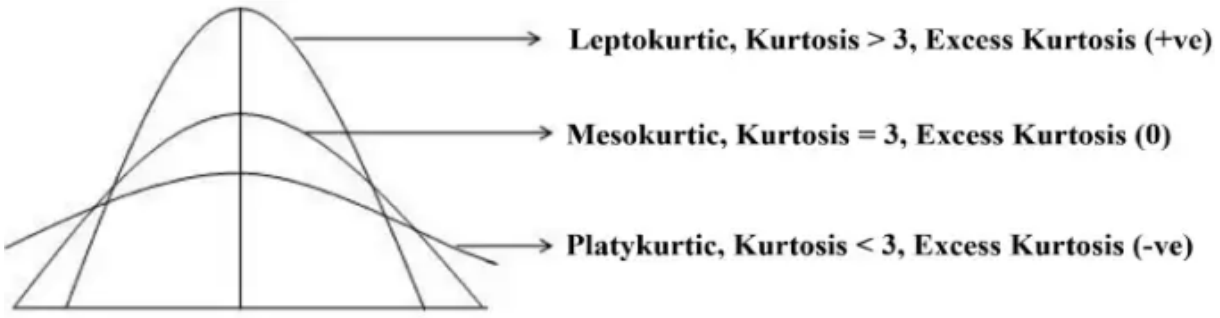
Positive skewness - **mean > median > mode**
Negative skewness - **mean < median < mode**

In our Placement dataset

etest_p,mba_p values positive so it is called **Positive skewness**
Ssc_p values positive so it is called **Negative skewness**

==========

Kurtosis



In our Placement dataset

Etest_p,degree_p values <3 so it is called **Platykurtic**
